Quality Seeds of Vegetables, Cereals, Pulses and Potato

SOURCE SEEDS

We produce our own breeder and foundation seeds of new and popular varieties of vegetables, cereals, pulses and potato. All seed production plots are inspected by our adept seed production experts, officials from the Regional Seed Testing Laboratory and District Agriculture Development Office, and farmers' group members during standing crop. We only sell the best source seeds that pass field inspection and seed laboratory tests.

HYBRID SEEDS

We produce our own F₁ hybrid tomato seeds by crossing elite inbred lines under strict technical supervision. Our hybrid seeds are grown in Nepal and have greater productivity and minimal risks compared to imported hybrid seeds.

TRUTHFULLY LABELED SEEDS

We only use field inspected and laboratory tested source seeds to produce our Truthfully Labeled Seeds. Our seeds are produced in partnership with small-holder farmers' groups. We follow the standard seed certification process and all our seeds are certified by the Regional Seed Laboratory of Government of Nepal.

MISSION AND OBJECTIVES

Anamolbiu is committed to producing and supplying quality seeds and value-added agricultural products of the highest quality. The company has following objectives:

- To provide high quality seed of a continuing stream of new varieties of vegetables, cereals, pulses and potato at competitive prices.
- To undertake Research and Development in Client Oriented Breeding and Heritage varieties.
- To provide seed related training and consultancy services.

Research and Development

Anamolbiu is one of the few seed companies in Nepal with a strong research and development focus. In partnership with government and not for profit actors, our research and development strives towards improving food and nutritional security of disadvantaged communities in Nepal.

Client Oriented Breeding

We are using client oriented breeding to tailor the development of our aromatic and other fine type rice varieties to the different terai and river basin production domains in Nepal. Our aromatic and fine type rice varieties will help farmers gain premium prices in the market.

Heritage Varieties

We are collecting germplasm, screening and assessing heritage varieties (local landraces) of vegetables for their unique traits. Increasingly valued by consumers for taste and nutrition, these heritage varieties are part of our proud social and cultural identity.

MARKET OUTLETS

Anamolbiu seeds are available at agro-vets in major markets of Nepal. In addition, Anamolbiu seeds are also available at its headquarters in Bharatpur, Chitwan and cluster office in Surunga, Jhapa.
